Revision: 4

The management unit contains 14 cells which accommodates detainees who have been sentenced and/or are on remand.

The unit is divided in two sections. Section one has 5 cells and a large exercise yard and has been designed to accommodate detainees over the long term.

Detainees in this area are on strict protection and cannot be accommodated in any other accommodation section of the facility because of the nature of their offences and the high risk of serious assault.

Section two contains 9 cells and a large exercise yard and has been designed for detainees on discipline / segregation.

Detainees housed in the management unit who are not on discipline / segregation orders may use some gym equipment and exercise in the outdoor exercise yard.
